

Project title:- *School Administration Management System*

Team members:-

Adithya M S (PES1UG19CS027)

Aditya Ramesh (PES1UG19CS033)

Aniruddha Krishna Jha (PES1UG19CS064)

Functionalities:

- Attendance
- Assignments
- Quizzes
- Notes
- Time Table with Links to the live sessions
- Dashboard/scoreboards
- Library books management system
- Access to recorded sessions
- Fee payment gateway
- Announcements
- Chat bot
- Online courses(Free or paid)

Use Cases:

- Hassle Free online fee payment along with fee receipt issued instantly after fee payment.
- Submission of assignments by eliminating redundant tasks of entering the student details for submission of each assignment.
- Schools could use our management system to handle attendance, assignments, quizzes etc. This would solve a potential problem since most schools don't use a management system right now.
- Chat bots to answer student queries.
- Announcements section which will keep students informed about the tests and other events that take place.
- Look for the availability of library books online.
